

South Cumberland

Sustainability Features

Waste Reduction

The Park recycles aluminum, cardboard, and paper.

Energy/Water Conservation

The Park has reduced the area it mows and has low flow fixtures at the visitor's center.

Biological/Ecological

The Park is home to numerous biologically sensitive areas. South Cumberland also has native grassland at Savage Gulf.

Environmental Education

South Cumberland has numerous environmental education opportunities spread across the year including a Turkey Tromp to learn about the life and times of the Tennessee turkey.

Historical/Community Significance

A Natural/Cultural history museum about the South Cumberland area is free to park visitors.

Moving Forward

Energy/Water Conservation

The Park will continue to replace old, outdated fixtures as they tear up with high efficiency fixtures.

Park Highlights

- Located in Grundy County
- Visited by over 650,000 people in 2011
- Over 90 miles of trails in park
- ADA 0.5 mile paved trail at Stone Door
